## Service and Maintenance

Function and fitting of the bathroom accessories should be checked on a regular basis. If fittings are loose they need to be tightened.

Cleaning is carried out to restore the original surface appearance, prevent corrosion and maintain hygienic conditions. If spots appear on the surface it is not due to the stain- less steel, but to impurities in the water, the air or to cleaning agents that have not been thoroughly removed from the surface.

## Cleaning Technique

It is important to clean stainless steel regularly. Initially, wash down the surface using soapy water or a mild detergent. Always thoroughly rinse the cleaning agent away with clean water. To complete the cleaning procedures dry/polish the item with a soft, dry cloth.

Within aggressive conditions, such as offshore, marine and swimming pool environments, it is especially relevant to ensure that cleaning maintenance occurs regularly.

Please do not use scouring powders, steel wool or any strong abrasive materials as these may damage the surface.

**Disclaimer:** **1.** Product shown in this catalogue is only for demonstration purpose, actual product may vary from the product as shown in the catalogue. **2.** Prices are subject to change without any prior intimation. **3.** Specification of the product may change without any prior intimation. **4.** All the test/performance are according to standard condition. **6.** Color shown is the representative colour and may vary from the actual product. **7.** All size in inches are approx.
